

California OES Weather Threat Briefing

Sunday, April 19, 2020
9:00 AM PDT

- Day 1 (Saturday): Threat for some thunderstorm activity today across much of Inland Region. No other significant impacts expected today.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

04/19/20 - 04/25/20

Sunday-Monday

- A few showers and isolated thunderstorms are possible across the state today, primarily over the Sierra, but most areas will remain dry and warm.
- A weak storm system will bring more widespread showers and isolated thunderstorms to the state on Monday, though most of the precipitation is expected to be fairly light.
 - Impacts do not currently look significant, though some snowfall may be possible in the high elevations of the Sierra
- Strong, gusty north winds will develop in portions of southern CA starting late Monday night

Tuesday-Saturday

- Dry conditions are expected across the state.
 - There is a chance of light showers in east-central CA on Tuesday.
 - Another storm system will bring areas of rain and isolated thunderstorms to northern CA on Wednesday.
- Strong, gusty north winds will continue across central and southern CA through Friday
